The attentive study and approach of the articles and literature of the journal "Zani i Naltë", shows that, except the religious themes, it has had in its objectivity the approach to national, cultural and educational issues, regardless of the specifics of the body, or the relevant institution it belonged. The contribution and the role of the Albanian-Islamic press, and especially the journal "Zani i Naltë", has been in service of the national-Albanian movement.

It has achieved positive results, which were not disputed even in the case of education and the national cultural information, so that these issues would not only remain within the narrow counties of society, but they would be even more pervasive and massively widespread.

In the journal "Zani i Naltë" we often observe messages that express the love for the homeland, for the nation, unity, youth, national culture etc., but also messages that express concern and preoccupation for the overall state of the Albanian people, especially for Kosova and Çamëria.

Many prominent national-religious personalities, and their contribution to the issue of the nation and homeland are part of this journal. Personalities such as: Haxhi Vehbi Dibra, Haxhi Ali Elbasani, Hoxhë Kadri Prishtina, Hafiz Ali Korça, Hafiz Ibrahim Dalliu, Sali Vuqitërnë, Ferid Vokopola etc., were also popular personalities of the national movement, important publicists and writers, but also associates and leaders of the Albanian-Islamic periodical.

Keywords : *"Zani i Nalte", culture, nation, periodical, education.*
